

ZIAD AHMED SALAH

+20 112 326 4192 | ziadahmedcs@gmail.com | LinkedIn: - [ziadahmedcs](#) | GitHub: - [ziadahmedcs](#) | [Portfolio](#)

Military Status: Completed

PROFILE

Computer Science graduate from Fayoum University specializing in backend development with Java and Spring Boot. Experienced in building scalable RESTful APIs secured with Spring Security and JWT, and working with MySQL and JPA/Hibernate. Solid understanding of OOP, data structures, and clean architecture. Also experienced in Flutter mobile development, with exposure to the full software development lifecycle. Passionate about building efficient, maintainable applications.

EDUCATION

Bachelor of Computer Science — Fayoum University

09/2020 – 07/2024

Faculty of Computers and Artificial Intelligence — Major in Computer Science | GPA: 3.3 (Very Good)

EXPERIENCE

Flutter Developer — [DROPIDEA](#), UAE (Remote)

12/2023 – 01/2025

- Built and improved Wi-Fi Card, a fintech app for transferring money and balances between networks, across multiple releases focused on performance and UI improvements.
- Enhanced Alwasit AITabi, a healthcare app, by adding real-time chat and integrating payment gateways for three connected apps (delivery, user, and pharmacy).

Mobile Application Intern — Information Technology Institute (ITI)

Summer 2023

- Completed an intensive Flutter & Dart training track covering mobile app development fundamentals.
- Gained hands-on experience with Dart, Flutter, and Firebase, alongside a foundation in HTML, CSS, and JavaScript for web technologies.

SKILLS

- Programming Languages:** Java, C++, Python, Dart
- Backend Development:** Spring Boot, Spring Security, JWT, REST APIs, Spring MVC, Spring Data JPA, Hibernate, Kafka
- Database:** MySQL, Firebase
- Tools & Technologies:** Git, GitHub, Postman, Docker (Basics)
- Architecture & Concepts:** OOP, Data Structures & Algorithms, Clean Architecture, SOLID Principles

PROJECTS

Backend (Java / Spring Boot)

- Food Delivery Microservices System** — Designed a scalable food delivery backend using microservices architecture (Auth, Restaurant, Menu, API Gateway, Eureka Discovery) with Spring Boot. Implemented JWT-based authentication with role-based access control (Admin, Restaurant Owner, Customer) and RESTful APIs with validation and centralized exception handling via OpenFeign, JPA/Hibernate, and MySQL. Containerized with Docker and architected for Kafka-based async communication for upcoming services. [GitHub](#)
- E-Commerce Backend API** — Built a full e-commerce backend with Spring Boot and MySQL, including JWT authentication, role-based authorization via Spring Security, and RESTful APIs for users, products, categories, and orders. [GitHub](#)
- Banking System Backend API** — Developed a secure banking backend with Spring Boot, Spring Security, and JWT, including account management and transaction services (transfers, deposits, withdrawals, and history tracking). [GitHub](#)

Flutter

- Shakhsni App** — Developed a Flutter app allowing patients to book appointments with doctors across specialties, plus a built-in pharmacy feature. [LinkedIn](#)
- Wi-Fi Card App** — Personal project; designed the app end-to-end using clean architecture and the BLoC pattern, with Firebase for chat and REST APIs for data.
- Alwasit AITabi** — Contributed to a 3-app healthcare suite (delivery, user, and pharmacy), adding chat functionality and payment gateway integrations.

CERTIFICATIONS

- Spring Boot REST APIs Certification — Udemy (2025)
- Mobile Application Intern Certificate — ITI (2022)
